iClicker Participating in a Poll for Students

Ankit Shah - 2023-07-25 - *M1 Student Materials*

How to Participate in a Poll with the iClicker Student App

Before starting, make sure you have [created an account](#) and [added your instructor's course](#) in the iClicker student app. Then, select the course from your **Courses** list.

Join the poll

A banner will appear on your screen when your instructor has started class. Select **Join** to participate.

Selecting the **Join** button checks you in for class, if your instructor has enabled Attendance. It also marks the start of your [Focused session](#), if your instructor has enabled Focus.

Read the question and select your answer

For Multiple Choice questions, selecting an answer will automatically send it. For Multiple Answer, Numeric, Target, and Short Answer questions, you must press the **Send** button to submit your answer.

You may change your answer as many times as you like until your instructor stops the poll. Your instructor may choose to not share an image of the question, or may wait to do so until after the poll has closed.

Question 1

Multiple Choice

In-Class Question: Multiple Choice

Why aren't **nucleosides** incorporated into DNA?

- A. The bases are not fully assembled.
- B. The sugar is not in the right form.
- C. There are no phosphates to make the phosphodiester bonds.
- D. The peptide bonds don't form.

Answer Received

C

Anonymous questions

If your instructor is asking an Anonymous question, an **Anonymous** icon will appear above the answer choices. In this instance, your answer will not be tied to your identity, but submitting an answer will count for any participation points your instructor awards.

Anonymous

Rate your confidence in your response

If your instructor has enabled it for the poll, a confidence rating will appear at the bottom of the screen once you submit your response to the poll. You'll select your level of confidence in your response: **Not confident**, **Somewhat confident**, **Confident**, or **Very confident**. Confidence ratings are aggregated and shared with your instructor anonymously.

Question 1

Multiple Choice

In-Class Question: Multiple Choice

Why aren't **nucleosides** incorporated into DNA?

- A. The bases are not fully assembled.
- B. The sugar is not in the right form.
- C. There are no phosphates to make the phosphodiester bonds.
- D. The peptide bonds don't form.

Answer Received

C

How confident are you in your answer?

Not confident	Somewhat confident	Confident	Very confident
---------------	--------------------	-----------	----------------

Viewing results

When your instructor stops a poll, you can view the correct response and, if your instructor has chosen to share them, the class results. On the web app, you will need to select the **Results** button to view the class results on a new screen. On the iOS/Android apps, the results will appear on the same screen. If your instructor did not specify a correct answer, the results bars will appear in blue.

Note: For Anonymous polls, you will not be able to view the response you submitted, but you will be able to view the overall class results.

You can also select the bookmark icon in the upper-right corner of this screen to save the question to your [Study Tools](#), where you'll be able to review past polls through flashcards and practice tests.

Question 1

+1.0 Multiple Choice

In-Class Question: Multiple Choice

Why aren't **nucleosides** incorporated into DNA?

- A. The bases are not fully assembled.
- B. The sugar is not in the right form.
- C. There are no phosphates to make the phosphodiester bonds.
- D. The peptide bonds don't form.

Chemical Structure: A diagram of a nucleoside showing a sugar ring with a hydroxyl group (HO) at the 2' position and a hydroxymethyl group (HO-CH₂) at the 3' position. A box labeled "Base" is attached to the 1' position of the sugar ring.

Your Answer: C
Correct Answer: C
Correct

All Results

Option	Percentage
A	20%
B	20%
C	60%
D	0%
E	0%

Continue answering questions

Each time your instructor starts a new poll, the question and the answer buttons automatically appear. Continue responding to questions until your instructor ends the class session. If you accidentally quit the iClicker student app during a session, simply select the course again and choose to rejoin the session.

Answer an exit poll

Your instructor may end class with an exit poll. [Learn more about exit poll notifications and responses.](#)
