## 5. Limitations of Waiting Room

- If the Waiting Room is enabled and set to capture all incoming participants, [join before host](#) will not work for that meeting. You can set internal account members or participants with a specific domain to bypass the Waiting Room.
  - Webinars do not support Waiting Room. Use a [webinar practice session](#) as an alternative.
  - The Waiting Room is disabled by default for [instant meetings](#) and [Zoom Phone calls elevated to a meeting](#). You can only enable Waiting Room for these meetings using the **Security** option in your [in-meeting controls](#).
  - If two-way chat with Waiting Room participants is enabled, the host and all participants will be required to upgrade to the minimum version or higher to join meetings. Alternatively, participants unable to update due to IT restrictions, can join through the [web client](#) instead.
